FIRE

FAULT

STEPS

NB: Controls must be enabled to perform **SILENCE ALARM** and **RESET**.

1. Press **SILENCE BUZZER:**
   - Internal buzzer will silence.
   - Fire LEDs will change from flashing to steady.
   The **SILENCE BUZZER** button's Yellow LED will switch on.
2. Press **SILENCE ALARM:**
   - Sounders will silence.
   The **SILENCE ALARM** button's Yellow LED will switch on.

VERIFY FOR FIRE OR A FALSE ALARM

IF FIRE CONDITION

1. Press **SOUND ALARM:**
   – Sounders will re-activate.
   The **SOUND ALARM** button's Yellow LED will switch on.
2. Contact Emergency Services.
3. Follow your standard Emergency Evacuation Procedure.

IF FALSE ALARM

Once false alarm has been confirmed:
- Press **RESET** and panel will return to Normal state.
NB: Reset can only be performed if controls are enabled.

STEPS

IF FAULT CONDITION

1. Press **SILENCE BUZZER**
   – Fault LEDs will change from flashing to steady.
2. Identify the Fault condition on the panel fascia.
3. Contact your service provider.
